

## Flex U – easy to vary

with or without Momento™

Flex U offers great flexibility; the U-shaped arms can be pivoted 180 degrees individually and therefore allow the towels to hang with space in between when necessary with the arms to the left or to the right.

You can choose between two widths, 455 or 655 mm, and from two to five arms. If you want to save money and save the environment, we recommend that you choose a Flex U with a Momento™ timer

A couple of practical accessories are available for Flex U.

- The shelf, which can be mounted on the top arm of the warmer, is a perfect place on which to store extra towels.
  - The chrome-plated Dekor knobs make excellent hangers for small towels.
- The possibility of adding a shelf and knobs makes this warmer very easy to adapt to your own specific needs.

### Electric towel warmer

Heat	Electric heating cable. ⚡

### Model

With or without Momento™ timer function.

### Accessories

Cable and plug: for connecting to electric socket.

**Dekor Hanger in oak/chrome, four-pack**  
Four brackets in untreated oak with a chrome-plated knob on each side provide a total of eight extra hangers. Perfect for small towels. Can be mounted quickly and easily on any arm of the warmer. Fits all versions of Flex U.  
Supplied in packs of four.

### Drying shelf

Easy to mount on the top arm of the heated towel warmer. It provides a warm, dry storage space for extra towels or other toiletries. The brackets feature four sizeable knobs on which you can hang small towels or dressing gowns. Surface of polished, chrome-plated steel. The shelf fits all versions of Flex U.
