

Mikado – looking good in the bedroom, hall, bathroom, kitchen or actually wherever you place it

Momento™ option

Mikado is a highly exclusive towel warmer that is suitable for the kitchen as well as for the bedroom, hall or for the bathroom. It consists of vertical rectangular rods, each with a knob for hanging hand towels, dressing gowns, hangers or bath towels on.

Mikado is also perfect as an attractive and unusual radiator, suiting whichever room you put it in. If you decide to have it in the kitchen, you'll not only give the room a luxurious feel but you'll also have an excellent place for drying your kitchen towels.

Combined towel warmer

Heat Water-filled. Choose between an electric heating element or connect it to the radiator circuit with a radiator valve or combine to have both.
